

1. After clicking on the link in Clean Access or going to the website <http://www.update.microsoft.com> you might get a message asking you to install the latest Windows update software. Click **Install Now**.

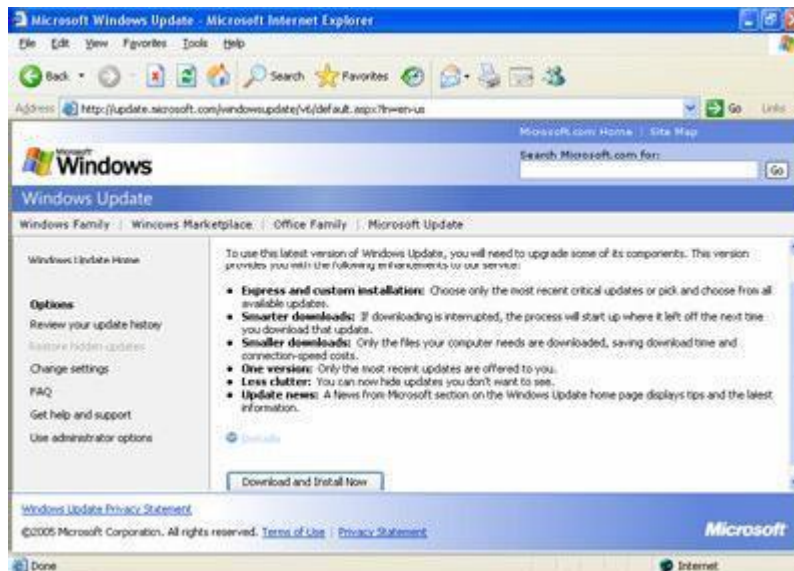

2. After the installation you will be asked to choose Express Updates or Custom Updates. Click **Express**.

3. On the Security alert click **Yes**

4. On the Upgrade windows click **Download and Install Now**

5. After the Updates are finished click Restart. After Restarting you might be asked to visit Windows update again and repeat the process. When you log into Clean Access it will tell you if there are any more required updates.
