Mapping to a network Drive for MAC OSX

1. In the Finder, click the Go menu, select Connect to Server.

2. For Server Address, enter smb://10.21.40.1/(name of share) then click Connect. (This will get you to shares on FS1)

3. Enter in ADMIN for the domain and your Whitworth network/email username and password and click OK.

4. A new icon will appear on your desktop and in your finder sidebar - that is your network drive. Double-click on the icon to open and use the drive.
