Whitworth University Guest Wireless Access for Vista

1. Right click on your wireless icon in your system tray in the lower right hand corner of your screen and select **Connect to a Network**.

   ![Connect to a network](image1.png)

2. Select the **Guest** network and click **Connect**.

   ![Connect to a network](image2.png)
3. If prompted, click **Connect Anyway**
SafeConnect is a new system Whitworth is using to ensure all computers connected to the network are running current antivirus software. If your computer is not running the current required software it will be blocked from sending traffic across the network. Below are instructions for Windows PCs, but Macintosh must follow a similar procedure not displayed. At the end of these instructions is a list of acceptable antivirus software. **Whitworth is no longer providing antivirus software.**

The first time you connect to the network or internet you will need to do the following:

(Nota: This is only required the first time)

1) Open **Internet Explorer** (*other browsers may not be supported*) and go to any web page other than [www.whitworth.edu](http://www.whitworth.edu), like [www.cnn.com](http://www.cnn.com), you will get following page.

   ![Internet Explorer Security Warning](image)

   **Select Yes I will install …**

   *Welcome to the Network!*

   In order to ensure a safe operating environment for all users of the campus network, all computers are required to install and run various software to ensure a safe operating environment (anti-virus software, appropriate security patches, etc.). To ensure compliance, we require that all users install a software in the way.

   *Click here to read the full Policy.*

   *Click here to select an option.*

   *Yes, I will install the SafeConnect Policy. Client and accept the terms and conditions for Internet Use.*

   When the initial File Download box come up, please click “Open.”

   Remember & Firefox seen, please click “Next” and when the File Finish downloading, click as the intention.

   *I DO NOT ACCEPT*.

   *If you click “I DO NOT ACCEPT” you will not have Internet access.*

2) **Run** this program – twice

   ![Internet Explorer Security Warning](image)

3) **Select Install** and the **OK**

   ![Internet Explorer Security Warning](image)
You will see this warning page explaining what access is giving to our guest network

4) You will have network and internet access once you reboot your computer. If your computer does not have the required software, a web page will be displayed stating the problem. If you need further assistance, you can call the Whitworth Computer Help Desk at 509.777.3911.
