Whitworth University Guest Wireless Access with XP

1. Right click on your wireless icon in your system tray in the lower right hand corner of your screen and select **View Available Wireless Networks**

2. Select the **Guest** network and click **Connect**

3. If prompted, click **Connect Anyway**
SafeConnect is a new system Whitworth is using to ensure all computers connected to the network are running current antivirus and are updated. If your computer is not running the current required software it will be blocked from sending traffic across the network. Below are instructions for Windows PCs, but Macintosh must follow a similar procedure not displayed. At the end of these instructions is a list of acceptable antivirus software. Whitworth is no longer providing antivirus software.

The first time you connect to the network or internet you will need to do the following:
(Note: This is only required the first time)

1) Open **Internet Explorer** *(other browsers may not be supported)* and go to any web page other than **www.whitworth.edu**, like **www.cnn.com**: you will get following page.

   Select **Yes I will install…**

   ![Welcome to the Network!](image)

   **Welcome to the Network!**
   In order to ensure a safe operating environment for all users of the campus network, all computers are required to install and run various software to ensure a safe operating environment (anti-virus software, appropriate security patches, etc.). To ensure compliance, we require that all users install a software key.

   [Click here to see the full policy]

   Yes, I will install the SafeConnect Proxy Key and accept the terms and conditions for Internet Use

   When the initial File Download box comes up, please click “Open.”
   Remove if Firefox open, please click “Save” and when the file finishes downloading, click on the installer.

   I DO NOT ACCEPT

   If you click “I DO NOT ACCEPT” you will not have internet access.

2) **Run** this program - twice

   ![File Download - Security Warning](image)

   ![Internet Explorer - Security Warning](image)

   **File Download - Security Warning**
   **Do you want to run or save this file?**
   - Name: ServiceInstaller.exe
   - Type: Application
   - Permissions: Run

   ![Security Warning]
   **Internet Explorer - Security Warning**
   **Do you want to run this software?**
   - Name: ServiceInstaller.exe
   - Publisher: Impulse Point LLC

   ![Security Warning]
   While files from the Internet can be useful, this file type can potentially harm your computer. Only run software from publishers you trust. [What’s the risk?]
3) Select **Install** and the **OK**

You will see this warning page explaining what access is giving to our guest network

4) You will have network and internet access once you reboot your computer. If your computer does not have the required software, a web page will be displayed stating the problem. If you need further assistance, you can call the Whitworth Computer Help Desk at 509.777.3911.
