

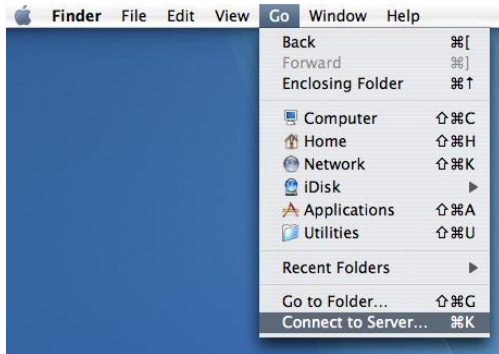

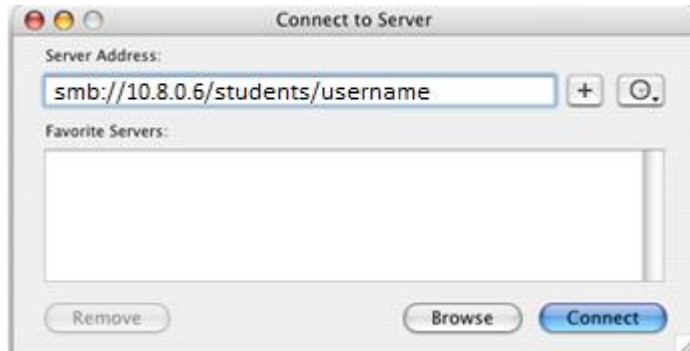

# Mapping to a network Drive for MAC OSX

1. In the Finder, click the **Go** menu, select **Connect to Server**.

2. For **Server Address**, enter **smb://10.8.0.6/students/(username)** then click **Connect**. (This will get you to shares on Stu-File)

3. Enter in ADMIN for the domain and your Whitworth network username and password and click **OK**.

4. A new icon will appear on your desktop and in your finder sidebar - that is your network drive. Double-click on the icon to open and use the drive.
